Fingertip 3.4 Release

Find out what's new with our latest update

Fingertip 3.4 is the latest in leadership technology, arriving shortly in your Teams tenant.

We've focused on strategic planning and execution with the annual clock and planner features, and on productivity with user experience improvements.

The annual clock feature is the top new feature from the 3.4 release and a lot of effort has gone into it. Anticipated by many of our customers, it offers a new way to view multiple plans over a period of one calendar year side by side. It offers a strategic outlook to what are the hotspots of the year and helps avoid massive concurrent workloads.

Our Planner integration is also getting more useful with each iteration. This time we have added support to Planner within all Fingertip activators. Now, creating Planner tasks related to (for example) decisions is easy and straight-forward, and improves the audit trail.

We've also implemented rich text to all description fields, meaning more creativity in expression when crafting your activators. Expect the change to streamline your communication and information flow.

Since the 3.3 release, we have also fixed several bugs, making this the most stable version of Fingertip yet. There have also been a number of other usability improvements in navigation, user guidance, copying and many more.

We hope you enjoy the Fingertip 3.3 update. Let us know what you'd like to see in the next edition and subscribe to our [product updates newsletter](#) to be the first to know when we're rolling out new features!

- Jaakko Pellosniemi

CEO and Founder, Fingertip

Annual clock view in collections BETA

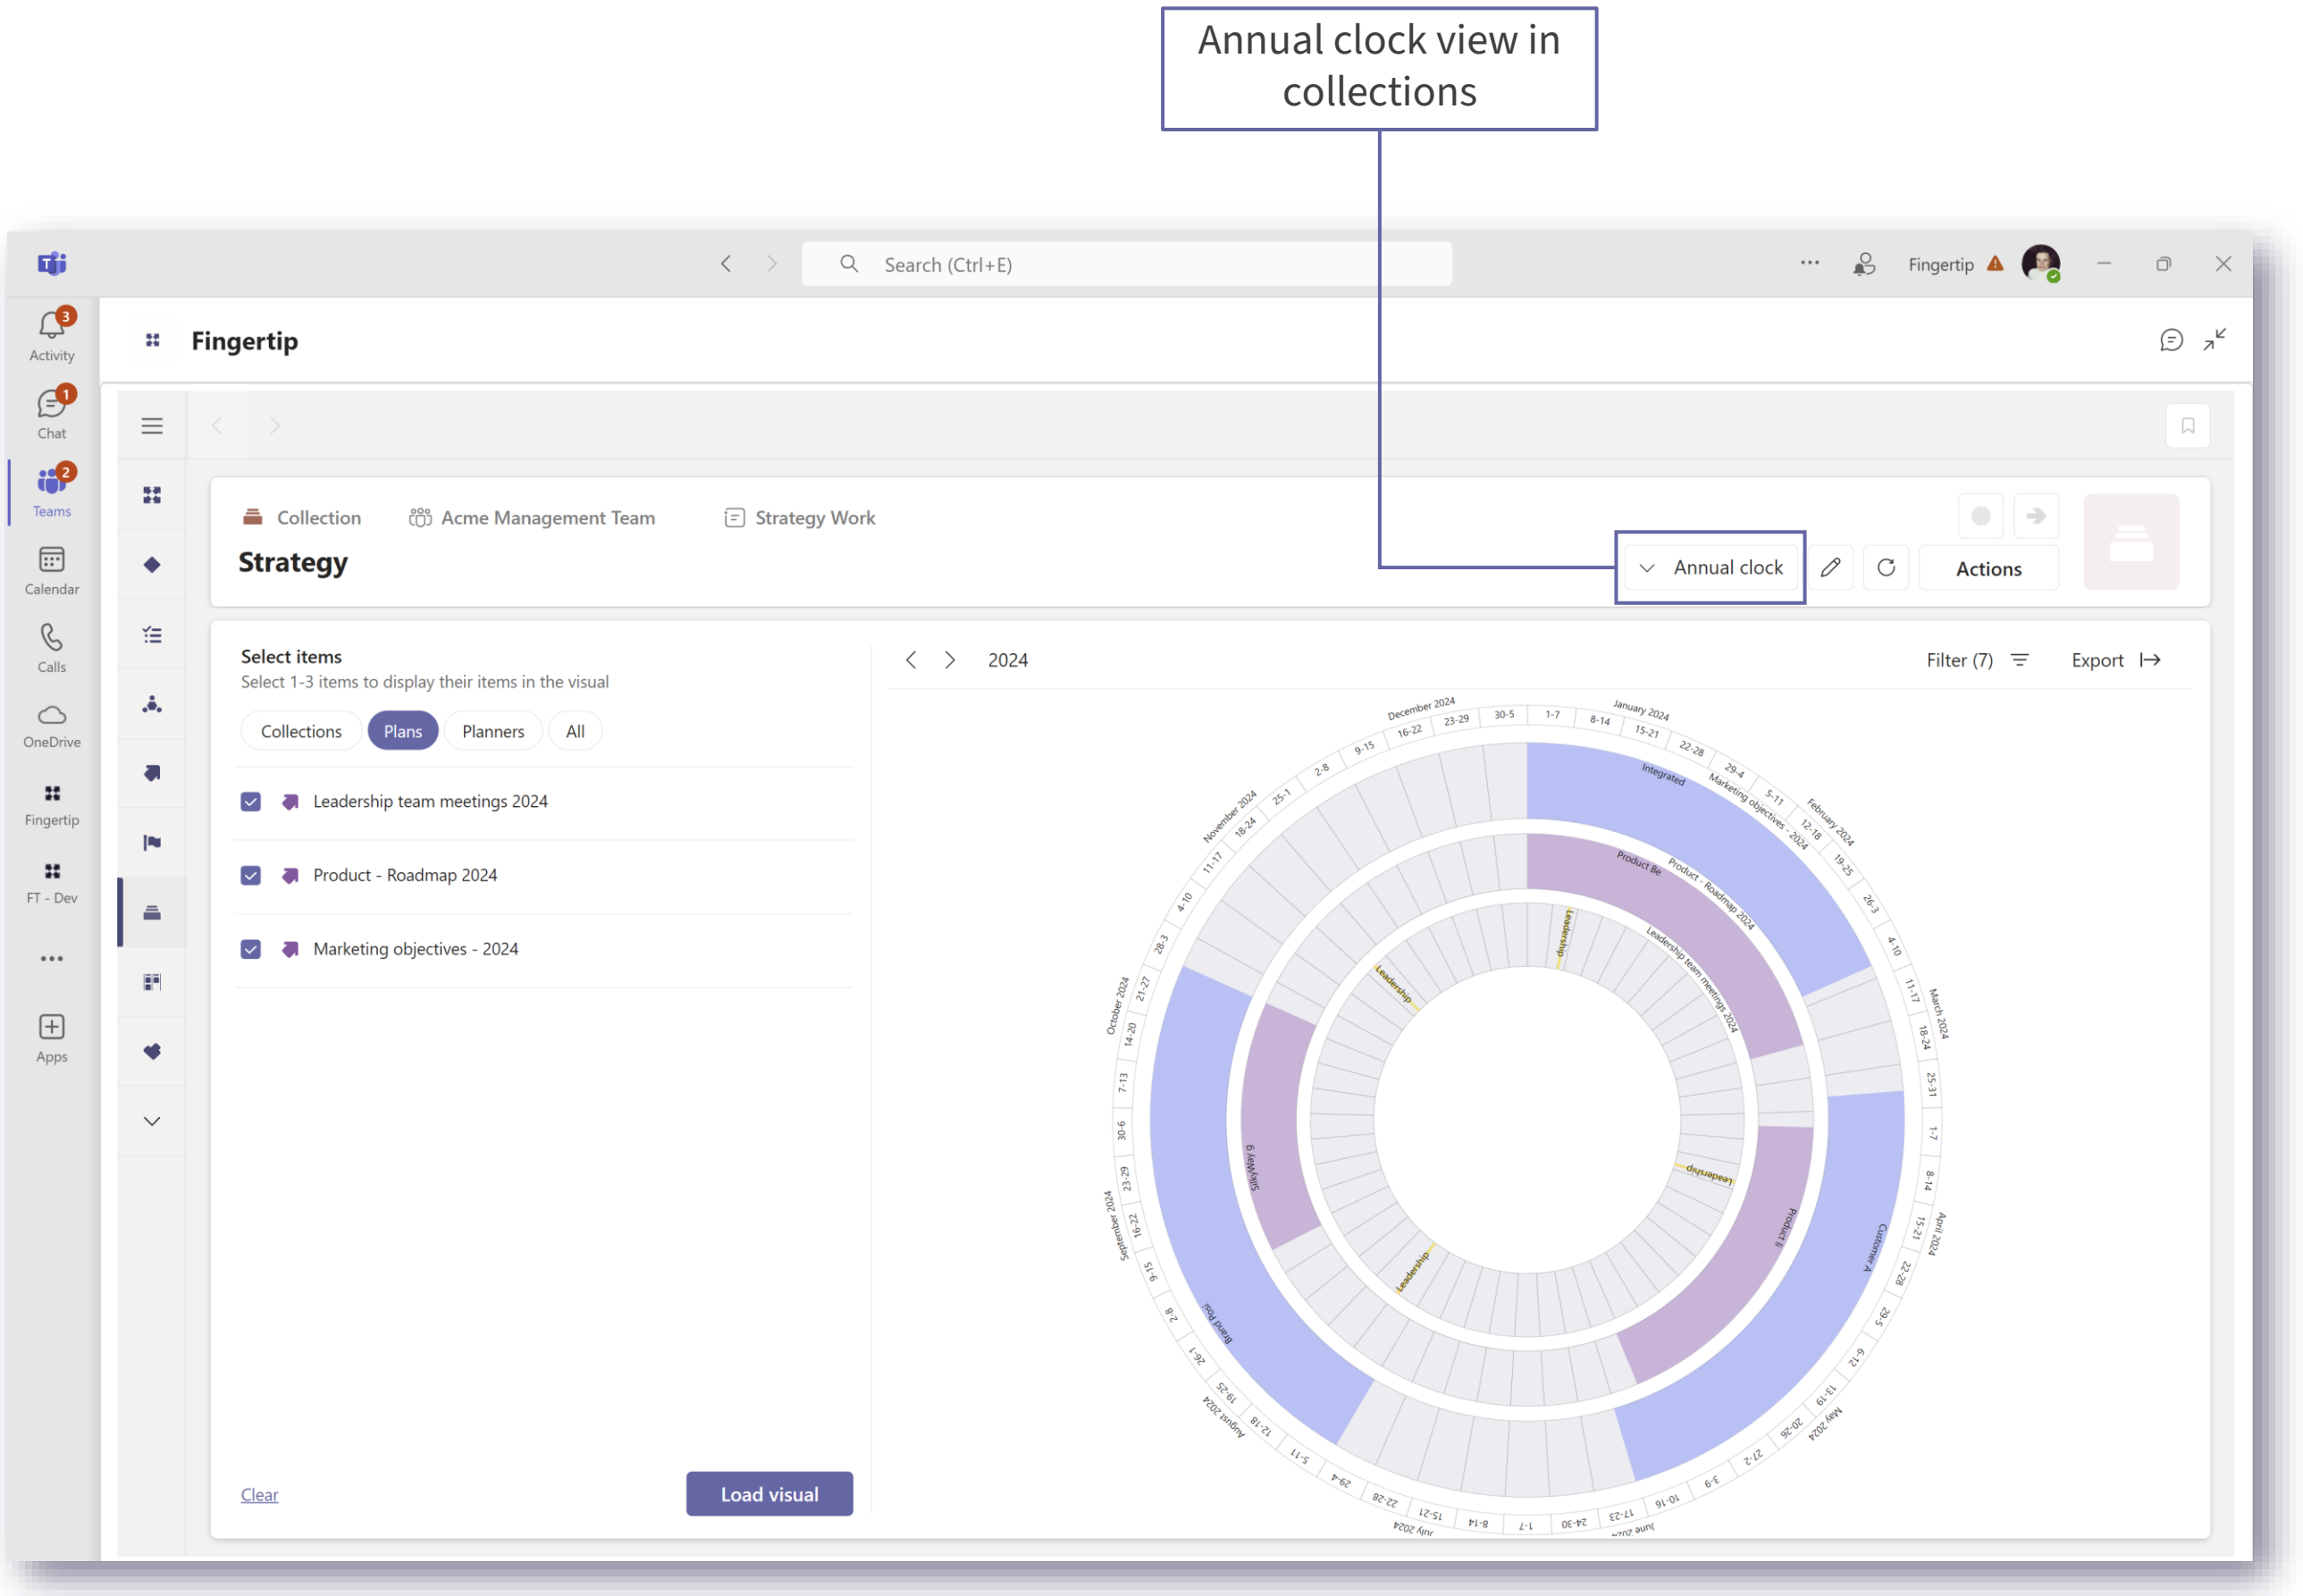

Easily visualize an entire year of activity across multiple teams

Annual clock is a powerful tool for strategic planning and operational efficiency. It provides a structured framework for managing time and resources, enhancing coordination, and driving the organization towards its long-term goals.

With the annual clock, you can choose Fingertip collections, plans or Microsoft Planners to be visualized. Load the visual and see their items’ duration over the year.

The annual clock has the following features:

- Click items to open them for viewing / editing
- Scroll to zoom the visual
- Change visualized year
- Filter to only show selected activator types
- Export to PDF and SVG

Planner task integration 3.0

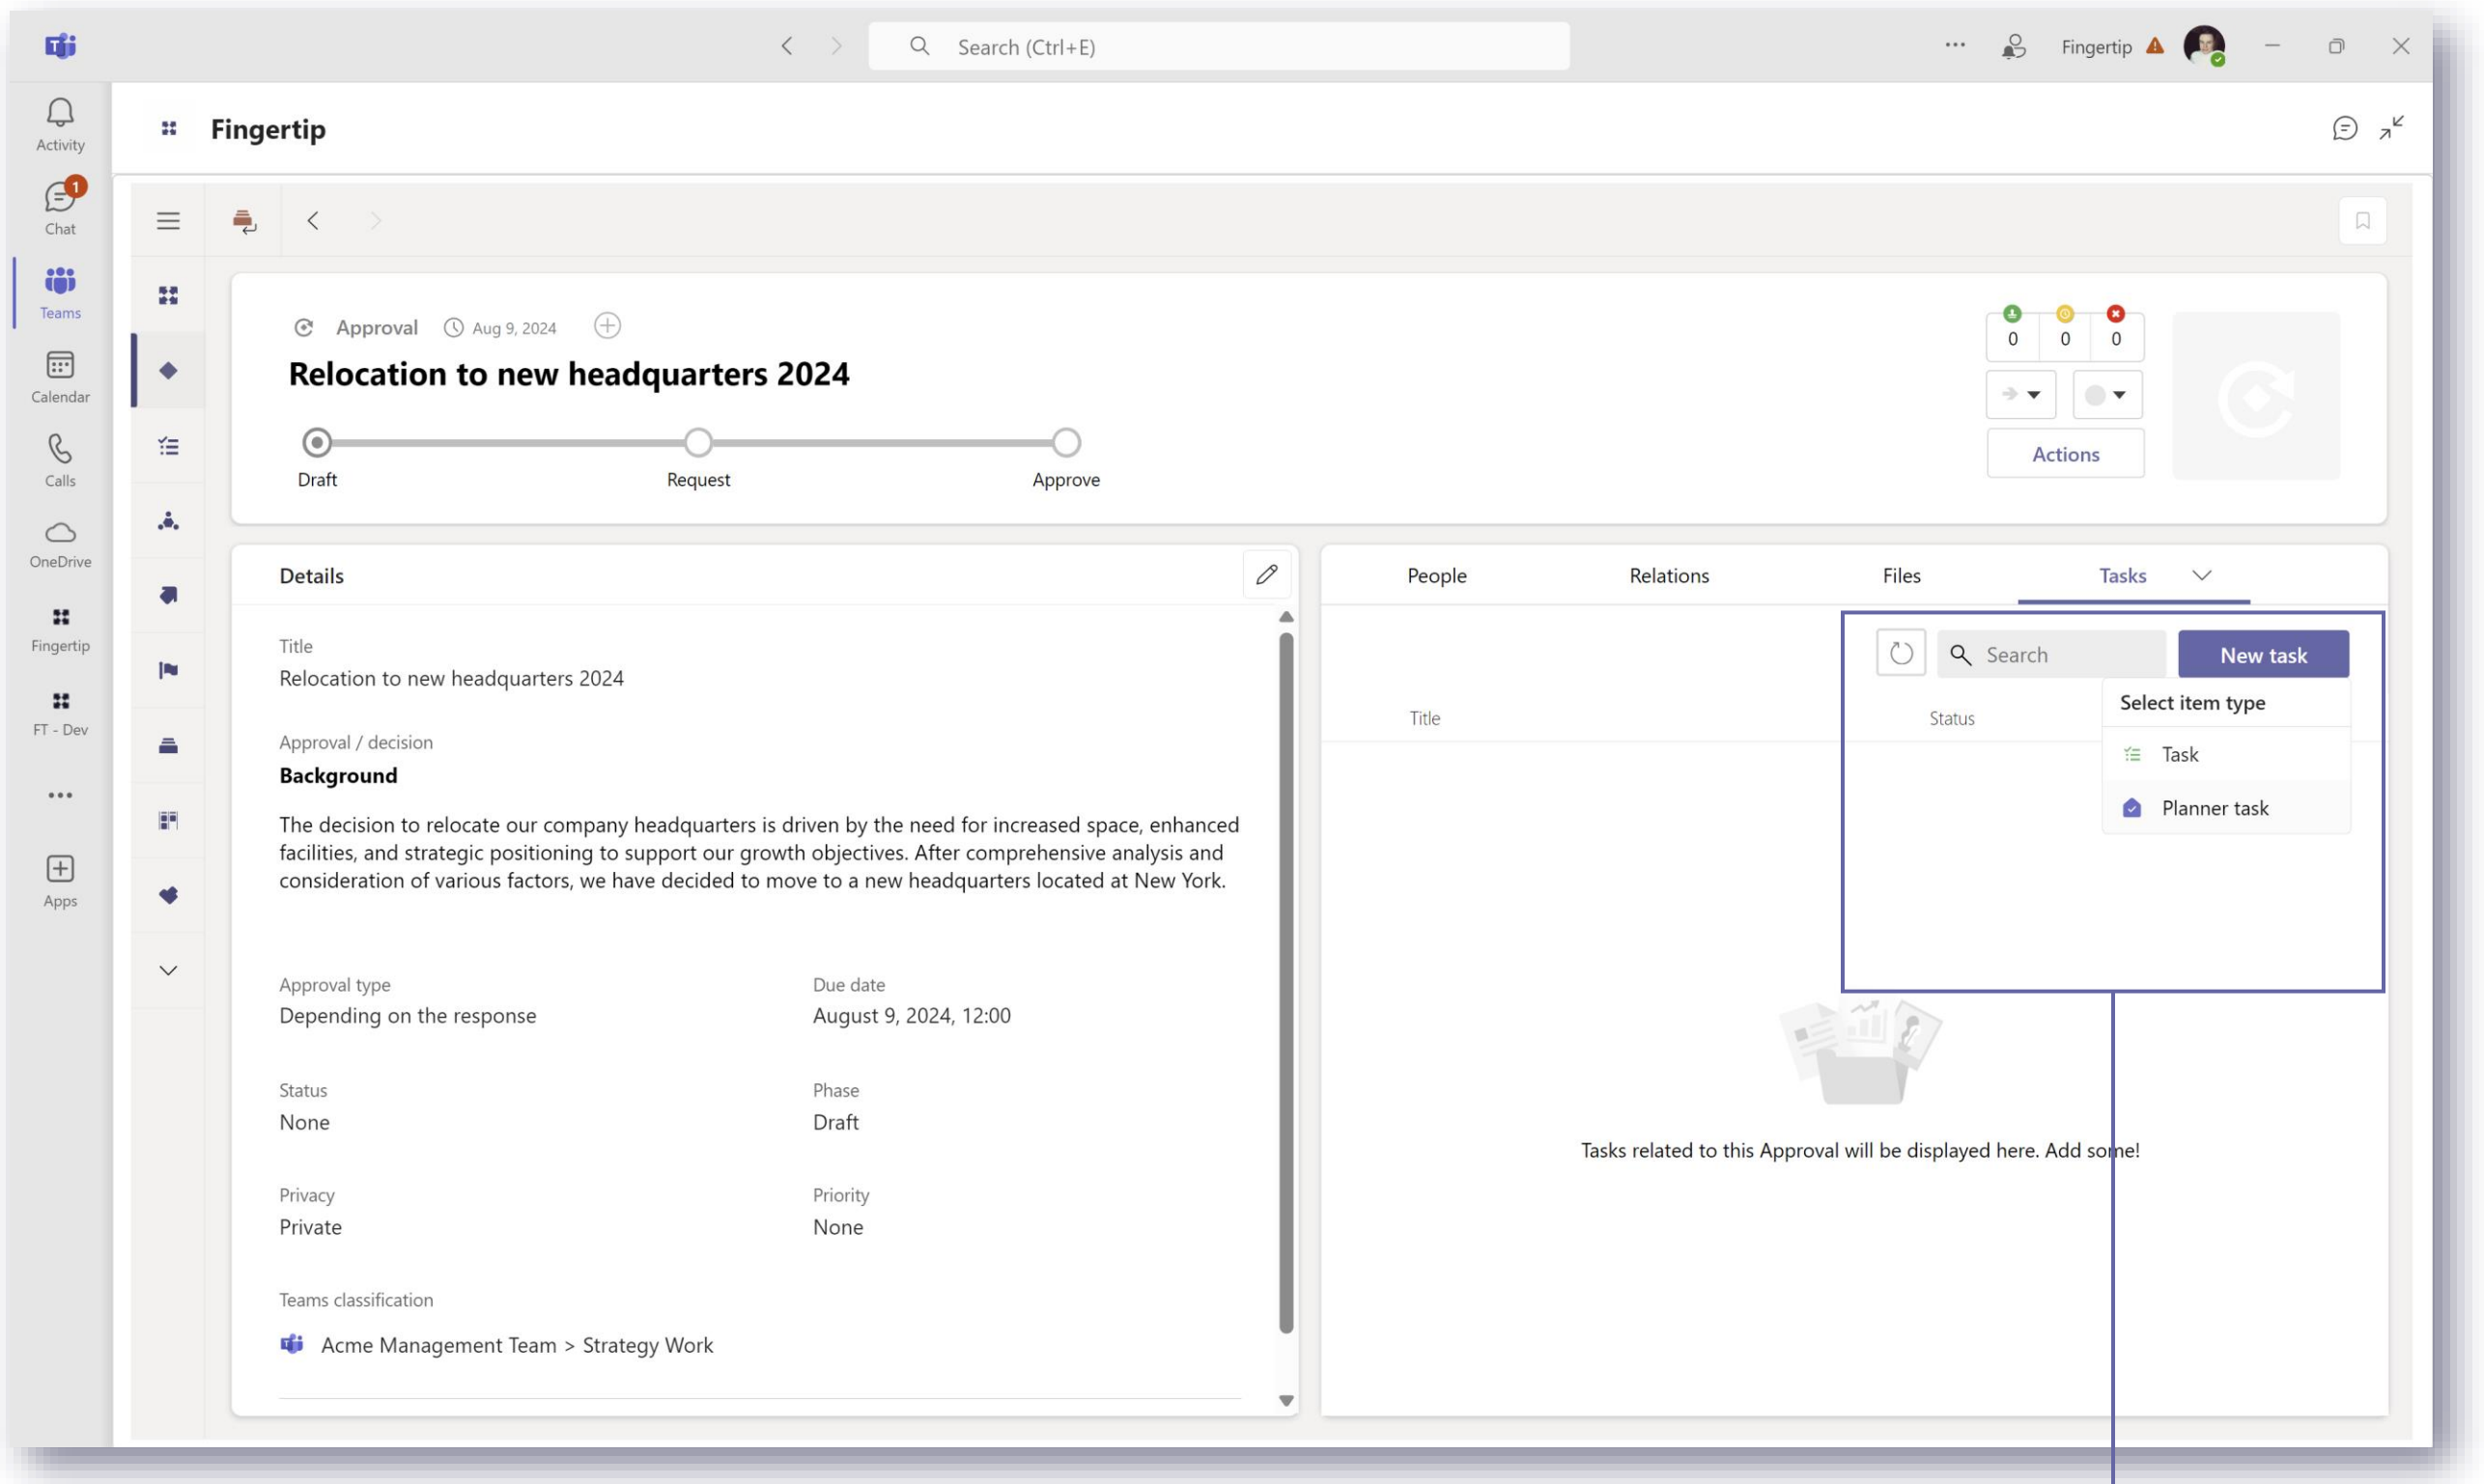

Manage Planner tasks inside Fingertip activators

The Planner task integration inside Fingertip is now stronger than ever. You can now use Planner tasks inside Fingertip to manage all your tasks in one place inside Microsoft Teams.

Fingertip now has the following new functionalities for Planner tasks:

- Add / edit notes of Planner tasks that are reflected to Planner
- Publish Planner plans and tasks as posts to Teams channels
- Add Planner tasks to any activator using the Tasks or Items tabs
- Link Teams files to Planner tasks (only viewable in Fingertip)
- Classify Planner tasks using Fingertip’s Teams classification

The Planner task features have also gone through several bug fixes to improve the overall user experience from Fingertip!

Planner tasks supported
in Tasks tabs

Rich text editor for all activators

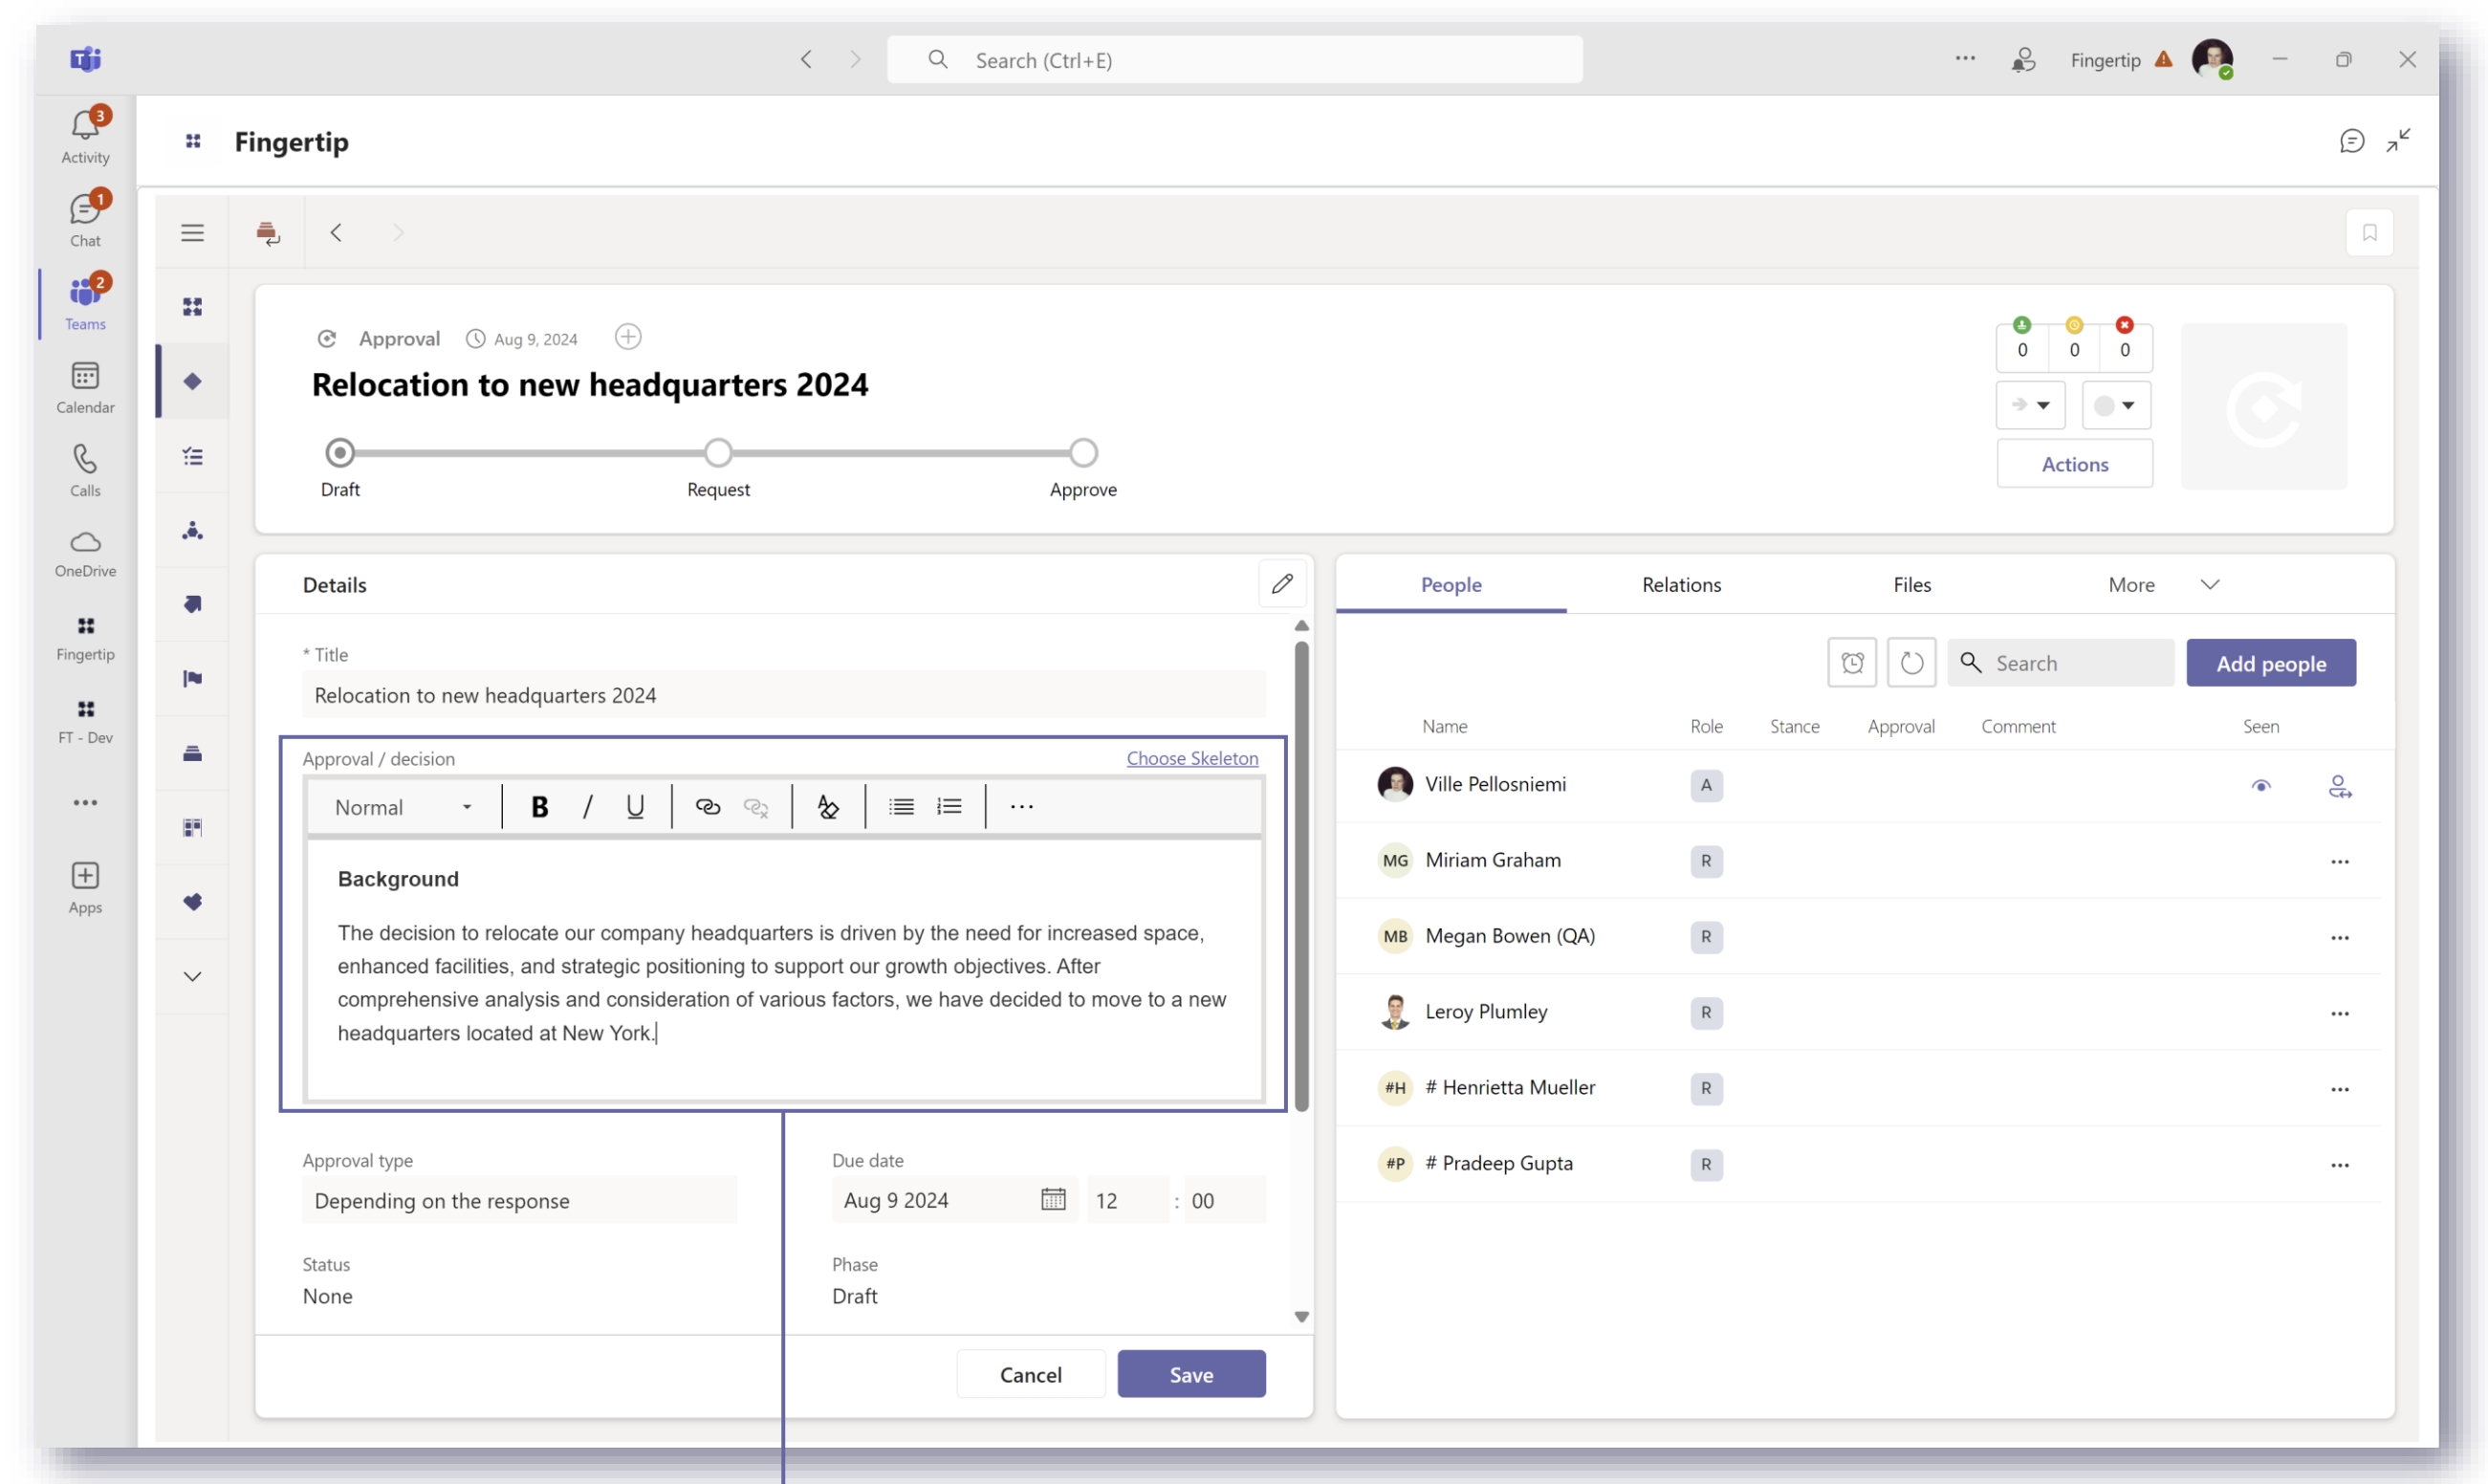

Empower your creativity: Edit Richly, Create Effortlessly!

A rich text editor for all activators enhances user experience by providing a more intuitive and flexible interface for content creation.

Users can easily format text, making their content more engaging and visually appealing. This functionality allows for greater creativity and customization, empowering users to express their ideas effectively.

This feature is available in all activators such as:

- All activators’ description / decision field
- Meeting agenda item description

Rich text editor to draft
your decision description

Improved navigation

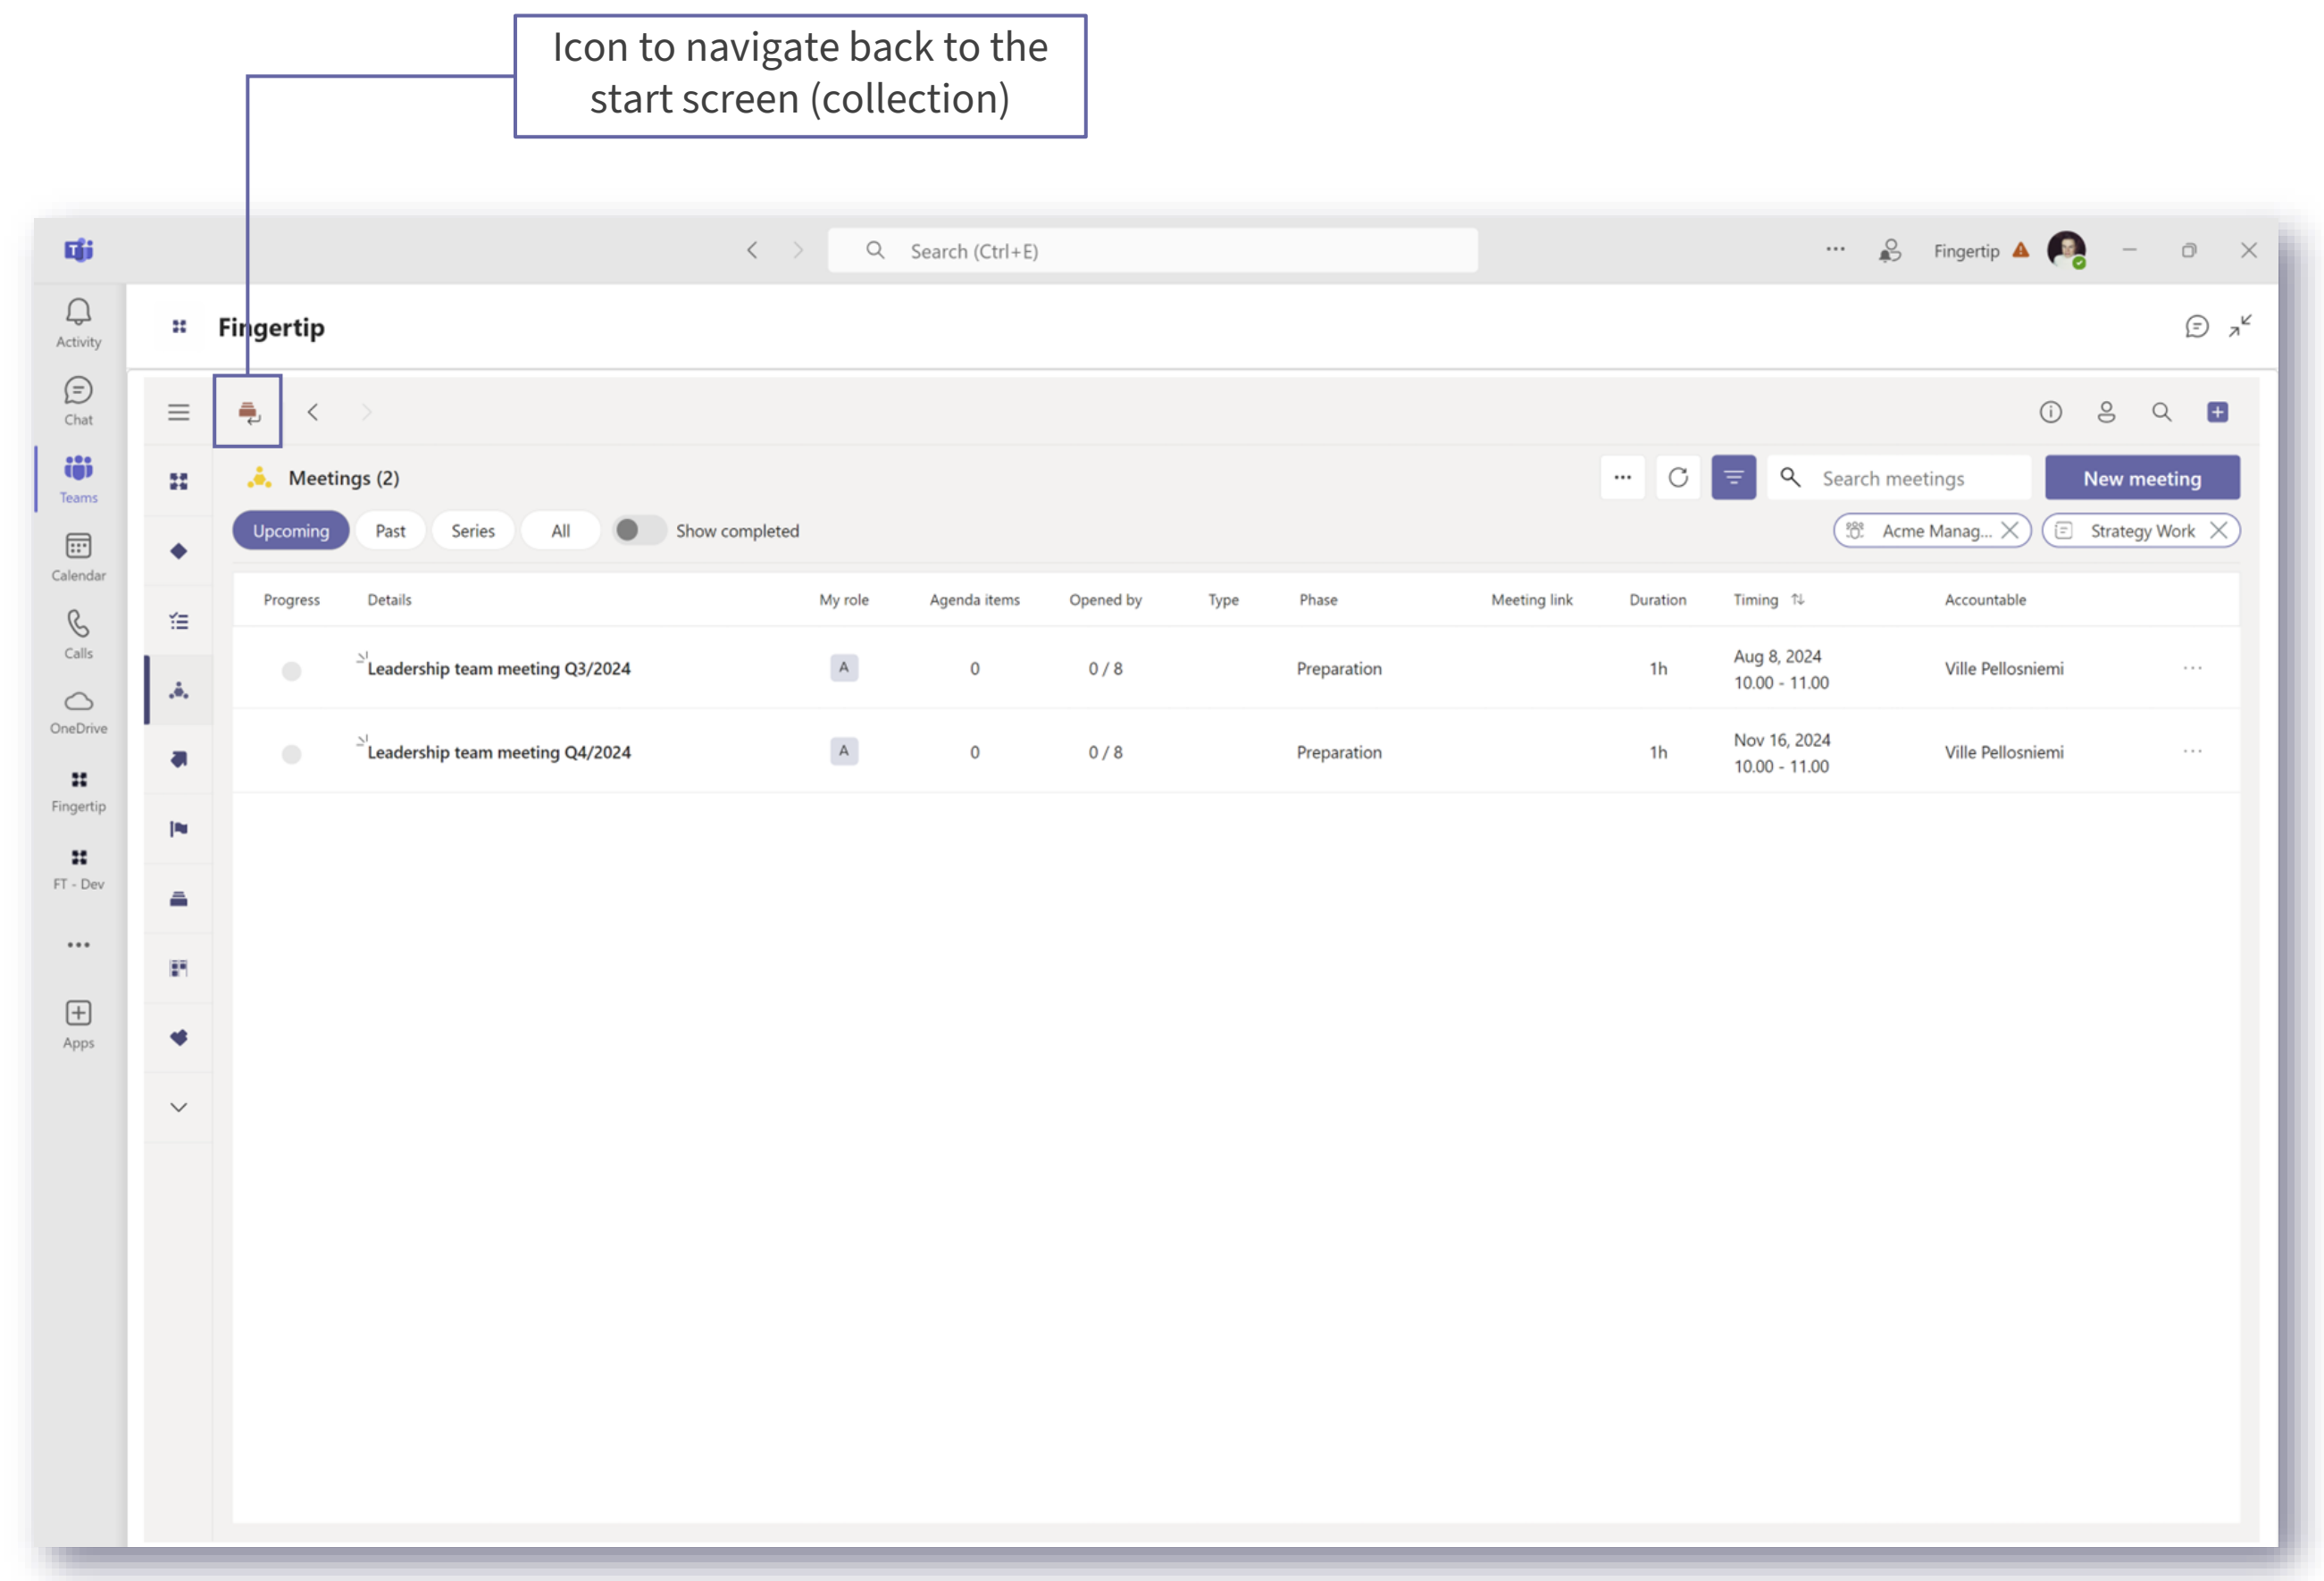

Effortless exploration around the screens

We have enhanced navigation within the Teams channel and popup application mode to provide a better end user experience.

Users can now easily move between different tabs and screens without losing their context, which saves time and improves productivity.

The ability to quickly return to the main collection or home screen after navigating through various activators helps maintain user awareness and makes the application feel more intuitive.

The icon to perform this action can be seen in the top left corner of the navigation. The icon is different depending on the context the user is currently in: a channel or a global app.

Other user experience improvements

Using Fingertip is easier than ever before

Fingertip’s user experience has taken another step forward and the user does not need to do as much manual work as before.

Changes have been made in almost all the functionalities. Here are the notable improvements:

- Change start time when copying
- Option to hide completed items from lists
- Faster load times in all screens
- Enhanced Finnish language support
- Tooltips when hovering over actions
- App stability in the Gantt and board views
- Several bug fixes in total to improve user experience
